Fall 1952

Spring 1953

PRICE LIST

Sunny Hill Nurseries and Experimental Farms

NORTH COLLINS, N. Y.

Free Experimental Plant Program

Each year we release a quantity of experimental Strawberry, Grape and Raspberry plants which have shown promise in our seedling experimental fields. These plants are shipped free of charge with every order for trial by you in your particular part of the country. All we ask in return is that you report back to us on how well these new varieties have progressed in your section of the country.

As our motto being: Forward in the name of God. Graft, set, plant and nourish up trees and plants in every corner of your ground. The labor is small, the cost is less, the commodity is great. Yourselves will have plenty, the poor shall have somewhat in time of want to relieve their necessity and God will reward your good merits and diligence.

All our plants are thrice inspected, disease-free and proven true to name and quality, grown in organic compost and hormone dipped before shipping to reduce transplant shock. As our plants are freshly dug and hormone dipped we cannot be responsible for any loss on plants stored over 6 to 7 days by the recipient.

Our 12 All-Star New Strawberry Varieties
